2. Novelty and inventive step - PCT Article 33(2) and 33(3)

2.1 The present application does not fulfil the requirements set forth in PCT Article 33(1) because the subject matter of **claims 1 and 14** does not comply with the requirement of novelty defined in PCT Article 33(2).

In accordance with the terminology in **claim 1** of the present application, **document D1** describes

(the references between parentheses apply to said document):

a method for estimating a propagation channel consisting of a series of multicarrier signal symbols (the abstract, lines 1-9) each of which includes at least one reference pilot (page 5, lines 16-19), and a plurality of data-carrying frequencies (page 5, lines 20-23), said method being characterised in that it includes at least one step of correcting said reference pilot(s) (page 8, lines 22-24; figure 8, unit 311) on the basis of a first estimation of a propagation channel (page 8, lines 20-21; figure 3, units 315 and 316) and in such a way that a second, more accurate, estimation of said channel is supplied (figure 3, signal 312).

It follows that the subject matter of **claim 1** is not novel (PCT Article 33(2)).

- 2.2 The same line of reasoning applies *mutatis mutandis* to the subject matter of **claim 14**.

The subject matter of **claim 2** is described in **document D1**, page 8, lines 20-21.

The subject matter of **claims 3-5** is described in **document D1**, page 5, lines 41-50.

The subject matter of **claim 6** is very vague and is, therefore, described in **document D1**, page 5, lines 41-50.

The subject matter of **claim 7** is not inventive because it is part of the routine practice of rejecting low-quality measurements during error evaluation.

The subject matter of **claims 8-9** is described in **document D1**, page 6, lines 10-21.

The subject matter of **claim 10** is not inventive because using the pulse response peak to achieve time synchronisation is a technical step well known to a person skilled in the art.

The subject matter of **claim 11** is described in **document D1**, page 6, lines 10-21.

The subject matter of **claim 12** is described in **document D1**, figure 3, units 316 and 311.
